

What Can Our Proprietary Digital Branding 2020 Platform Do For You?

If your answer is “no” to any one / or all of these questions, you need our next generational Internet Digital Branding Platform.

- 1)** Do you have the ability, financially or otherwise, to create constant and non-stop publicity (not a few appearances, or a one-time exposure, but constant exposure) on the most expensive and most trusted media outlets in the world such as CNN, Fox Business Network, Oprah Winfrey Network (OWN,) CBS Nationally Syndicated Radio, American Airlines, CNN Airport Network, Lifetime Real Women, and various other networks, cable and news outlets.
- 2)** Do people remember the name of your products/services, or the name of your company, especially if you are in the new field of health, wellness, beauty, and anti-aging, all of which started growing dynamically about 5 years ago? This is a relatively new industry, and one that is recession resistant. This is your opportunity to get your fair share of the 500 billion dollars that are poured into this industry per year.
- 3)** Do people understand the benefits to their health and wellness that your product offers? Do they have a clear idea about the “chain-reaction” your healthy product provides?
- 4)** Do you feel that although you are doing everything right - you have a great website; you call around the whole day long; - and yet you are just not selling enough and hardly getting by. Are you completely satisfied with your net profit?
- 5)** Have you done SEO consistently almost as an investment (or “cost of doing business”) to get on the first page of Google, and in the first position? You probably still are paying for SEO to get absolutely nowhere. But, in order for your OWN DEMOGRAPHICS - or even those that cannot afford your products/services, - to find you, they still NEED TO KNOW YOUR EXACT NAME! Otherwise nothing will happen at all. And, I am sure you learned that by now. Have you been able to sell to your maximum potential just by SEO?
- 6)** Do people know your exact name to Google, your website and still not buying because in your potential consumer’s mind: your site can be “stating or claiming anything.” Every beauty product is always the “best” - is not it? Especially today when we need to cut through so much fog to get to the best. You need to be “endorsed” by a third party in order for your prospects to say: “I trust this one!” This is just a fact of our modern world today. Do you get enough sales through education that is trusted?
- 7)** You have your own website. You can say anything on your own site. It will never really be credible unless a third influential party “endorses” you. Just by having your own website, have you been able to sell to your maximum potential?
- 8)** Have you been able to distinguish yourself from your competition to the degree that you can make the living you deserve by selling your unique products, not only online, but on the next generational IT technology platform? That platform is not coming, that platform has arrived! But, do you have the time to learn a whole new business: the ever-changing technology of the Internet while you are busy selling your products that have yet to be recognized? How would you find the time, the knowledge and the trust to be an IT engineer on top of what you do every day? Do you know the structure and meaning of digital branding 2020 that can carry you for 3 years and sell that which contributes to a healthier and less age-less, more youthful- world for you and all others?

9) Are you able to compete on the Net with a platform that collects hundreds of companies' websites, and their millions and sometimes billions of customers in a logistically perfect combination, basically cherry picked? ONE platform that collects the topics that belongs together; A new comprehensive, and Futuristic Logistics; bringing a brand new paradigm; a global technology renewing the lives of those that can actually FIND YOU? Are you being found on the Internet, which as of now is full of conflicting information every day although millions would want to know what you are offering?

10) Do you know any other search technology besides Google, Yahoo and Bing?

11) Have you been part of a life changing and consumer friendly (finding you within a nanosecond) environment where Celebrities, the Entertainment Industry, Non-profit Organizations Voice Initiation on your behalf? Where large corporations Fund you or Academic Research and send their messages around the world in which you can now partake?

12) If your products / services contribute to a better world – and where three key health and age related fields are FINALLY intertwined, thus bringing life changing information to millions of consumers through Academic and Holistic Research through a trusted comprehensive matrix that helps billions around the world, would you want to feel that you are a part of such a life changing contribution? (A human being can only change / control what they put on their body and into their body, along the way they think. Can you say that you are part of that limited number of companies that actually care about the change they initiate and bring about the awareness of all of the above? And, if so, do people at large (at least half a billion) know you and your message?

13) Have you been able to achieve a simple editorial non-stop message on any of these gigantic national and international media venues and at the same time being called one of America's Most Promising Companies, within that editorial message? An EDITORIAL message consisting of simple everyday words that your prospects can remember and act on it right away? WE ARE NOT ABOUT ADVERTISEMENT!!! We do not support that at all. Any straightforward advertisement is ignored almost all the time! Have you been able to interact with your buyers through simple editorial messaging and so they know that you are one of America's Most Promising Companies?

14) If you were asked would you know what products have been discovered and instituted that we never heard about, much less know their names?

As an example: Did you know that there is something called "this or that" and it is actually good for you? Do you know HOW AND WHY IT IS GOOD FOR YOU? And would you have Googled on it if you have not been asked about it?

15) Did you know that there are over 3 million people Googling one or most or all of these subject that we address? If you did, and were part of the program you would have just gained 3 million pairs of eyes discovering you and looking at your products AND ACTUALLY LEARNING ABOUT YOU?

16) Are you trying to raise funds for your Start Up company or just working capital, but you cannot prove to the investor or the "stores" or to any venue through which you intend to sell that you have created enough awareness about your product that any sales channel will sell your products / services for sure?

17) Have you noticed that although you have a great product people do not know about it because you do not have the means to advertise non-stop, and explain a brand new invention? Therefore, you are just simply not found on the Internet because the search key words are not even known to the public? The fact that you are part of a new industry (anti-aging and health conscious) with new and revolutionary products or services that people are not aware of, much less to search for on the Internet – tells you that you must somehow make sure that people learn about a brand new item that never has been even in existence before. Are you being found? Do people at large know what to even search on?
